

- **Final Project Presentations: 25% of final grade**
  - prepare a 20 min talk to present your final project.
  - register for one of the available time slots. First come — first serve!
  - **DEADLINE to send to the instructor the final version of the slides via email is midnight on Feb 1.** *No changes to the slides can be made afterwards!*
  - presentations will be held in Microsoft Teams: one team member will be the moderator changing the slides during the presentation.
  - **each team member must have functioning a video cam and mic; make sure to test using these ahead of time!**
  - the talk should follow the same structure as the final paper
  - every team member should speak for about the same amount of time (~7min for a team of three, and ~10min for a team of two)

- **Final Project Presentations: 25% of final grade**

- following the talk, be ready to answer questions for 10-20 more minutes on topics covered in class and related to the talk. There can be questions about the code you wrote for the project.
- the final questions will be addressed to a specific team member, who has to provide the answer; every team member will be asked a different question.
- students' performance will be evaluated individually; yet part of the grade will be for presenting as a team.
- teams will **NOT** receive feedback on their projects *before* the talk.
- presentations will be open to attend by all students (attendance is not enforced); attending students will have the opportunity to ask questions within the allotted time, if they wish to do so.
